TECHNICAL SKILLS

Front End: Javascript, React.js, React Native, Vue.js, Sass.

Back End: Ruby on Rails, MySQL, PostgreSQL, Node.js

Currently learning: Android Development and Heroku/AWS.

CAREER SUMMARY

I am experienced in customer service as well as full-stack web development utilizing React/React Native and Ruby on Rails.

In my next role, I am looking to successfully apply my aptitude for leading teams, analyzing data, enhancing workflow, and building relationships as I did while working at Tek Experts and pursuing my degree.

SOFTWARE ENGINEERING PROJECTS

G.O.A.T Planning- Frontend | Demo | Backend

React Native mobile app for adventure-goers to easily make and record plans with their friends(Final project of Flatiron School).

- Utilized JSON Web Tokens and PostgreSQL to store encrypted user information on Heroku deployed backend.
- Combined React Native libraries to create a simple to use UI design with functional map, camera, and calendar features.
- Managed state with React Redux and Hooks.
- Accessible through Expo-CLI with version 2.0 in development to meet Apple's App Store requirements for further deployment.

Snack Maps - Frontend | Demo | Backend | Site

Webpage for food lovers to locate nearby restaurants across the globe

- Joined Leaflet Map Library, JavaScript, and CSS to render geolocated Zomato API restaurants on user-click.
- Established Ruby On Rails backend to handle JWT sign up and sign in authorization.

Animania - Team Github | Demo

World's top 50 Anime selector made in collaboration with peers.

- Designed the front-end of this project utilizing event listeners and json data requested from the Anime API.

WORK EXPERIENCE

Senior Service Engineer- Tek Experts August 2019 - November 2020

- Maintained interactions between end users and relevant technical personnel to correct issues regarding Azure SQL Databases and Azure Virtual Machines.
- Contributed to over 60% of the team's successfully resolved cases/customer problems.
- Selected to design a Jedi-Padawan Mentorship program for each engineer vertical which became a global new-hire onboarding process.
- Worked closely with Azure DevOps who recommended Flatiron School's Software Engineering Bootcamp

Custodial Manager- Jan Pro Cleaning February 2018 - August 2019

- Maintained safety policies and secured/locked down multiple buildings .
- Responsible for leading 2 cleaning crews and 3 work sites.
- Implemented new cleaning processes and strategies to reduce necessary man-hours by 5 hours per week.

ACADEMIC BACKGROUND

Flatiron School   October 2020 - February 2021

Full-Stack Software Engineering Certificate
Fast paced course that teaches frontend and backend software development in JavaScript/React and Ruby on Rails over 16 weeks.

Pikes Peak Community College   August 2018 - May 2020

Associate of General Sciences- Mathematics and Sciences(Classes through CSU Pueblo)
Graduated from PPCC as a dual enrollment of Colorado Springs Early College High School to simultaneously acquire both degrees.
